

STG2 Module

STG2 C2 10P
(Disconnection Module)

STG2 U2 10
(Connection Module)

Description

Introduction

STG2 Module is the last evolution of STG range of connection modules. This module offer category 5e transmission performance as a standard. As a result this module can be used in any modern network and is fully compatible with all kind of application (xDSL, SDH, ...)

Application in Network

- Suitable for high density installation, 1000 pairs on 2.135 meter vertical open rack, 800 pairs on 1.900 meter vertical floor mount cabinet, containerized exchanges, ...
- STG2 Modules are suitable for public access carrier (MDF, cross connection cabinets, building distribution) as well as for structured cabling and high data rates transmission.

Highlights

- Category 5e as a standard
- Very compact size (14 mm. pitch)
- 0.4 - 0.8 mm. wires
- Tin-lead plating on contacts avoid corrosion
- 2 wires can be accommodated in the same slot
- Fits on 3M Quante Pouyet STG2 back mount frame
- Tool of module can use on 3M Quante Pouyet STG2 and Krone LSA Plus
- Complete range of surge protection circuits (Overvoltage and Overcurrent protection)
- Approval from TOT
